PLENARY PANEL

# Households, Financial Markets, and the Economy

A MODERATED CONVERSATION WITH FOUR GUEST SPEAKERS

> How do the saving and investment decisions of households shape financial markets and the wider economy?

## PANELISTS

**Francisco Gomes**
London Business School

**Michael Haliassos**
Goethe University Frankfurt

**Alexander Michaelides**
Imperial College London

**Olivia S. Mitchell**
University of Pennsylvania

## THE CONVERSATION

As households face longer lifespans, changing pension systems, increasingly complex financial choices, and greater responsibility for their own financial security, questions around saving, investing, financial literacy, and retirement preparedness have become more important than ever.

FMARC 2027 brings together four internationally renowned scholars for a plenary panel, a moderated conversation on these questions and their implications for households, markets, and policymakers.
